Band Information:

MYNDED was formed in late 2011 in Straubing, Germany. The first EP „Humanity Faded Away“, which contains five songs, was released in early 2013 and was recorded and released by themselves. Also the first music video for the song „No Regrets“ was released.

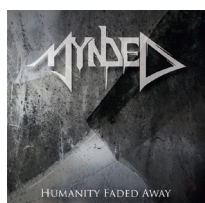

During 2014 the group started to work on their full length debut album „Dead End Paradise“. They worked together with Steffen Kummerer from Obscura/Thulcandra, who also lent his guitar skills for the solo of the song „Nuclear Downfall“. A first tour experience was made in December 2014, when the band supported Ektomorf on their Outcast Bells tour.

In November 2015 „Dead End Paradise“ was released world wide through Sonic Revolution. The album received a lot of positive feedback and made MYNDED a inherent part of the German Underground Thrash Metal scene. Also a music video for „Driven Into War“ was released.

In 2016 they had the opportunity to show off their energetic live performance at the Metaldays Festival in Slovenia, which also was a springboard to more confirmed shows outside their home country. For December 2017 a tour with the thrashers from Crisix was also confirmed.

After six years of the band's existence they can look back at one EP and one full length album, two music videos and around 100 shows!

Currently the band is working on new material for the second album, which is planned to be released in 2018.
